

Canary
Islands **FILM**

L o c a t i o n s

THOUSANDS OF LOCATIONS JUST ONE STEP AWAY

The forces of nature and the volcanic origin of the Canary Islands built an unusual geography that features a variety of extraordinary natural landscapes. From white sand beaches to age-old leafy forests, breathtaking cliffs, undulating dunes by the sea, volcanic landscapes that belong to other worlds and sea beds with amazing visibility.

Humans have also contributed to creating the largest number of locations imaginable: colonial-style farms, picturesque towns, lonely roads, modern European cities, industrial areas, etc. Whatever the type of landscape you're looking for, you'll find it in the Canaries.
